

Inverter prices in Manchester UK

Overview

How much does a solar inverter cost?

Our guide to solar inverter costs covers everything you need to know before purchasing your solar panel system. Below we'll cover: The cost of solar inverters varies from £500-£2,000 for the average property. The price depends on the type (string, micro or hybrid) you choose, the quality of the brand, as well as the size you need.

How much does a string inverter cost?

Most string inverters come with a 5- to 10-year warranty that can be extended for a premium. Considering most solar panels come with a 25-year warranty, it goes without saying that you will at some point have to replace your inverters. The average solar PV inverter replacement cost of a string inverter typically ranges from £500 to £1500.

How much does a microinverter cost?

Microinverters can cost from £20 to £100 a unit. It can cost around £2,500 for the average solar panel system comprising 14 panels, including installation costs like wiring. You'll face greater upfront costs when creating a system that uses microinverters, and the bill can be quite high if you're planning on a large installation.

What is a solar inverter?

A solar inverter is a vital segment of a solar power system that converts the direct current (DC) electricity produced by solar panels into alternating current (AC) electricity, which is suitable for powering your home appliances and feeding back excess electricity into the grid.
