

Ip65 waterproof portable power bank

Overview

How much Mah is a waterproof power bank?

The massive 30,000 mAh is enough for up to 13 full charges of most smartphones and is so powerful that it can be used with laptops and portable gaming devices. If you need a waterproof power bank to use outdoors and last for multiple days at a time while still charging all your gadgets, this is 100% the one to get.

What is the best waterproof power bank?

As you can see from the chart below, an IP68 would be the highest possible rating. However, most of the best waterproof power banks are rated to IP67, which is more than enough protection for rugged outdoor use.

Are Anker power banks waterproof?

Anker power banks are not waterproof and nor do they claim to be. The casing is made from waterproof materials but does not have a waterproof construction. Water can get in through the joints and the charger input, so it won't fare well if submerged. If you spill water on it or it gets a little bit wet in the rain though, you should be ok.

Which power bank charger should I buy?

If there is a chance your power bank will become submerged, then this is the one you want. The Powerness U36 10050mAh Power Bank Charger with LED is perfect for day trips and keeping in your backpack on hikes. The new carabiner fastener also means you can fasten it to your backpack if using it with a solar charger.
