

Irish solar energy storage solar container lithium battery manufacturer

Overview

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

What kind of batteries does EIR solus have?

Eir Solus currently has 350+ megawatt under development Standalone batteries typically consist of lithium-ion cells, which offer high energy density, long cycle life, and efficient charge/discharge capabilities. We also develop Hybrid Energy Storage System (HESS) projects which consists of two or more types of energy storage technologies.

What is Eir Solus?

Eir Solus develops stand-alone battery storage systems as well as hybrid energy systems that link battery storage with wind and/or solar plants. Batteries are an important building block of the energy transition, as they stabilise electricity grids and enable a faster expansion of renewable energies.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.
