

Jakarta invests in air energy storage project

Overview

What will Jakarta's data infrastructure look like?

In a significant step for Jakarta's data infrastructure, the facility will also incorporate a 120 MW-hour battery energy storage system and use renewable energy from the JIEP partnership as its main source of power, indicating a strong commitment to climate-aligned growth and energy sustainability.

Where did Indonesia sign a data centre deal with Aslan Energy Capital?

The deal was signed in Jakarta, the capital of Indonesia. Image: Aslan Energy Capital. Singaporean renewable energy developer Aslan Energy Capital has penned a new deal with Indonesia's Jakarta Industrial Estate Pulogadung (JIEP) to develop a 40MW data centre with a 120MWh battery energy storage system (BESS).

Is Jakarta a data center hotspot?

Jakarta is one of Indonesia's data center hotspots, with several major providers with facilities in operation and development in the city, including Equinix, STT GDC, and Digital Realty. Jakarta is also home to Google and Microsoft, which both operate cloud regions in the region.

What is a two-story vertical building in Jakarta?

In alignment with Jakarta's urban planning and environmental needs, the facility is designed as a two-story vertical structure utilizing modular and prefabricated components for rapid deployment and minimal construction impact.
