

Kathmandu Modular UPS Uninterruptible Power Supply

Overview

Can a 10kVA module be upgraded to a 100kva UPS system?

Each module has a power of 10kVA and can be upgraded to 50kVA or 100kVA UPS systems according to your specific circumstances. The 10kVA modular UPS (uninterruptible power supply) at SCU can be combined into 50kVA and 100kVA UPS system to provide backup power for facilities.

Why are ups manufacturers focusing on large-power modular systems?

UPS manufacturers are starting to focus on large-power modular systems, mainly due to increasing demand from the data center vertical and the increasing end-user awareness level on both operational and technical advantages.

What is the market share of modular UPS in 2022 & 2023?

Modular UPS systems are dominated by medium(20 to 200 kVA) and large power ranges above 200 kVA. They account for 89.6% and 90.3% of the total market revenue in 2022 and 2023. The 20 to 200 kVA range is the most attractive segment in the medium power range; this segment accounts for 39.8% and 38.6% of the total revenue in 2022 and 2023.

Is modular UPS a good option for backup power deployment?

When it comes to backup power deployment, the trend is still towards using well-proven technologies (e.g., traditional free-standing UPS) which has caused a slowdown in the adoption of innovative new solutions (e.g., modular UPS systems). This is mainly due to the lack of product knowledge and end-user misconception about modular technology.
