

Latest Model of Smart Photovoltaic Energy Storage Containerized Fixed Type

Overview

CATL showcased its latest TENER Stack series containerized 9 MWh battery energy storage system (BESS), targeting Europe's data centers, industrial applications, and more, at Intersolar Europe 2025. What is integrated photovoltaic energy storage?

Among these alternatives, the integrated photovoltaic energy storage system, a novel energy solution combining solar energy harnessing and storage capabilities, garners significant attention compared to the traditional separated photovoltaic energy storage system.

What is a containerized battery energy storage system?

Let's dive in! What are containerized BESS?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is a tener energy storage system?

Tener is a standard 20-foot containerized energy storage system equipped with CATL's energy storage-specific L-series long-life lithium iron phosphate cells. The energy density of the storage system is 430 Wh/L with a total capacity of 6.25 MWh, which CATL claims is the highest in the world.

What is adaptive PV & hybrid storage?

The integration of adaptive PV technology with hybrid storage controlled by AI enables self-tuning on both generation and storage sides, resulting in greater reliability and scalability than fixed systems.
