

Liquid Flow Energy Storage Project in Milan Italy

Overview

Why should we invest in Italy's digitised energy infrastructures?

The company's commitment translates into both proprietary solutions and adaptation - already today - to the most stringent EU requirements for digitised energy infrastructures. The Italian storage market also represents a key test bed for large-scale integration of renewables and smart grid management.

How much money will be invested in accumulation technologies in Italy?

"The expectation is that by 2030 almost 20 billion euros will be invested in accumulation technologies in Italy, and we want to play a leading role in this transformation," says Julian Nebreda, CEO of Fluence-multinational active in 50 countries, 15 of which in Europe.

What is the largest grid-connected storage system in Europe?

In particular, the Blackhillock project in Scotland, with 300 MW/600 MWh, is today the largest grid-connected storage system in Europe and capable of guaranteeing grid stability exclusively through batteries. Sma took care of the engineering, plant control integration and grid studies to prove its effectiveness.
