How long does a lithium ion battery last?

The lithium-ion batteries that dominate today's residential energy storage market have a usable life (70% capacity or more) of 10-15 years, which is roughly double the lifespan of the lead-acid batteries used in the past. However, the lifespan of a lithium-ion battery also depends on its chemistry and how you use it.

Do LFP batteries last longer than NMC batteries?

In general, LFP batteries tend to last longer than NMC because they are more resistant to high temperatures that degrade battery life. However, the lifespan of a battery also depends on how you use it. According to a 2020 study by the National Renewable Energy Laboratory (NREL):.
