

Main models of rooftop solar inverters

Overview

What type of solar panel inverter do I Need?

The most common type of solar panel inverter used in solar panel installations is the string inverter.

What are the different types of solar inverters?

When it comes to home solar installation, homeowners have three types of solar inverters to consider: string inverters, string inverters with DC power optimizers and microinverters. Each inverter setup comes with upsides and downsides. Here's what you should know.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

How do I choose the right solar panel inverter?

Choosing the right solar panel inverter is also a matter of compatibility. Solar panels and inverters must be compatible in terms of their voltage and power characteristics. When a solar inverter is not correctly matched to the solar panels, it results in poor system performance or damage to the equipment.
