How can Argentina achieve profitability in the manufacture of cells & batteries?

Achieving profitability in the manufacture of cells and batteries requires scale and cutting-edge technology. Argentina is a late entrant to an advanced technological race that requires significant R&D efforts, especially in the highly competitive electromobility segment. Public companies can play a key role.

Does Argentina have a strategy for the Electromobility sector?

On the one hand, Argentina has so far not defined a clear strategy for the electromobility sector. There are several plans developed by different ministries that define lines of action and goals for the sector. However, a comprehensive and focused policy on the productive transition towards electric vehicles has not yet been established;.

Are there EV stock targets in Argentina?

Of the four types of targets that are usually set, in Argentina, there are only EV stock targets which were defined by different national ministries. This lack of coordination makes it difficult to establish a coherent and comprehensive strategy, leads to possible overlapping of actions and resources, and undermines the credibility of these goals.
