

Marseille energy storage power supply import

Overview

How does the port of Marseille-Fos use electricity?

The Port of Marseille-Fos buys electricity with renewable certificates of origin. In order to further improve the overall energy mix for OPS connections, it is planned to equip the port buildings' roofs with photovoltaics in order to reach the level of power required for the simultaneous connection of all the vessels.

Does the port of Marseille-Fos provide onshore power supply (Ops)?

The Port of Marseille-Fos provides Onshore Power Supply (OPS) for ships at berth and constantly looks at expanding its OPS connections network.

How will the port of Marseille Fos be financed?

civil engineering works, electrical equipment, distribution to berths and mobile connection systems (CMS). The Port of Marseille Fos aims to eventually connect a 3rd and 4th cruise ship. This work will be financed by the French government via the Recovery Plan, the Southern Region, the Aix Marseille Metropolitan Area and the Department of 13.

What is the port of Marseille-Fos strategic project 2019-2023?

The Port of Marseille-Fos is committed to continue the effort in the framework of its Strategic Project 2019-2023, that aims to reduce the environmental nuisances and impacts in the whole Marseille Basin. As part of the project, new OPS connection points will be deployed to serve more terminals and shipping companies.
