

# Marseille fully supports new energy storage

## Overview

---

This guide explores why local businesses and municipalities are partnering with specialized battery energy storage suppliers in Marseille to unlock grid flexibility, reduce costs, and support France's net-zero goals. How much energy storage capacity does France have in 2022?

France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

Why should you choose Mars renewable?

MARS RENEWABLE is committed to becoming the global leader in energy storage technology and storage asset origination. We believe our solutions and technologies will greatly help to accelerate the deployment of energy storage and renewables worldwide, and to empower our customers to achieve their ESG and sustainable vision.

Who is Mars renewable?

We offer All-in-One energy storage solutions and full-lifecycle services to bring value to our customers. MARS RENEWABLE is born to be a global energy storage player. Our European operation first took root in Spain and now we have teams in full function in Italy and France.
