

# Montevideo Flow Battery Supply Chain

## Overview

---

Could China invest in EV & battery manufacturing in Mexico?

A much-speculated possibility is that Mexico could seek greater Chinese investment, deepening its ties with Chinese EV and battery manufacturers. On paper, this partnership appears strategically sound—it could accelerate industrialization, diversify manufacturing, and provide access to advanced technology and cost-efficient supply chains.

What are the supply chain diagrams for nmc622 and LFP materials?

(c) Supply chain diagrams for NMC622 and LFP materials. The sankey diagram illustrates the flow of minerals from raw material extraction through ore processing, battery material processing, and finally into the production of EV battery packs.

Are LFP and NCA batteries good for the environment?

In these scenarios, it is assumed that only one country produces the battery cells, positive active materials, or lithium hydroxide. For the baseline scenario, the results show that the LFP battery is favorable from an environmental perspective, while the supply chain of the NCA battery has the highest environmental indicator scores.

Does the US contribute to the global EV battery supply chain?

The US still contributes little to the global EV battery supply chain. South Korea and Japan have significant stakes in the downstream raw material processing supply chain, especially in manufacturing cathode and anode materials. capital, and above-ground limitations. The attributes mentioned above are crucial since the future.
