

# Morocco installs solar panels

## Overview

---

Why is Morocco deploying solar panels?

Morocco is not just deploying solar panels—it's pushing the technological envelope. In 2023, MASEN launched a pilot project integrating advanced lithium-ion battery storage with the Noor Midelt solar plant, enabling reliable power delivery during cloudy days and nighttime hours.

Why is Morocco investing in solar power?

Morocco is intensifying investment in solar power in the hope of hitting a target to raise the use of renewables in its energy mix to more than half. The country has set a target of 52 percent renewables by 2030 after achieving previous targets, local media reported.

Is Morocco ready for solar energy?

Morocco's outlook for solar energy is as bright as its desert sun. The government's latest roadmap, unveiled in March 2025, targets an installed solar capacity of 10 GW by 2030—an ambitious leap from the current 3.5 GW. New projects are underway in regions like Tata and Zagora, where high solar irradiance promises optimal yields.

Does Morocco have a solar plan?

Morocco is planning USD 13billion expansion of wind, solar and hydroelectric power generation capacity which would catapult the share of renewables in the energy mix to 42% by the year 2020, with solar, wind and hydro each contributing 14%. Moroccan Solar Plan
