

New Energy Battery Cabinet Flame Retardant Site Cabinet

Overview

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) — fire protection from the outside-in and from the inside-out.

Are battery storage cabinets safe?

Without the right separation, climate, and safety measures in place, storing batteries on-site poses a dormant but potentially expensive and devastating threat to your work environment. CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them.

Why are battery storage cabinets important?

These safety cabinets play a crucial role in ensuring the safe storage and use of batteries, particularly as the use of rechargeable batteries rapidly increases in electric vehicles, portable electronic devices, and renewable energy sectors.

What is a battery safety cabinet?

Additionally, these safety cabinets are equipped with anti-static devices to prevent battery damage or accidents caused by static electricity. With the rapid development of the new energy industry, the application of batteries in energy storage is also becoming more extensive.
