

New Zealand solar container battery air transport capacity restrictions

Overview

How many spare batteries are allowed per passenger?

No more than 15 spare batteries are permitted per passenger. All spare batteries must travel as carry-on luggage. If a device that contains batteries cannot be stored as carry-on luggage and is stored as checked-in luggage, it must have the ON/OFF switch protected to prevent accidental activation.

How many batteries can you take on a plane in 2022?

AvSec removed more than 190,000 batteries from passengers' carry-on and checked-in luggage in 2022. Make sure your batteries leave the airport with you, and check the restrictions before you travel. Batteries must be protected by packaging or terminals covered. Each person is allowed a total of 20 spare batteries.

How many batteries can be carried on a plane?

The operator may approve the carriage of than 20 batteries. Limited to maximum 2 spare batteries. Wh rating does not exceed 2.7 Wh for lithium-ion batteries per device. If the baggage is to be checked in, the lithium battery must be removed and the removed battery must be carried in the cabin.

When will lithium ion batteries be available for air transport?

From 1 January 2026, lithium-ion batteries that are packed with equipment and vehicles powered by lithium ion or sodium ion batteries must be offered for air transport with the battery at a reduced state of charge, unless otherwise approved by the relevant tates (A331).S
