

New infrastructure construction of solar base stations for Nepal communications

Overview

Huatong Yuantong (HT SOLAR POWER) and Nepal Telecom reached a strategic cooperation intention, and successively developed a communication base station solar power supply system solution for the project in view of Nepal's climate and regional differences. How many solar projects are being built in Nepal?

According to Department of Electricity Development, about 17 solar projects are currently being constructed in Nepal. NEA along with private sector investors are developing these projects. The department has already issued the license for the construction and the work of these projects is going on full swing.

Who supports infrastructure construction in Nepal?

These projects are often supported by the Asian Development Bank (ADB) and World Bank, along with municipal governments. Infrastructure construction in Nepal is not just about building roads and power stations—it's about building the future.

Is solar power a viable alternative source of energy in Nepal?

As an alternative source of energy, solar power is gaining popularity across the global as well as in Nepal. Although the major investments for electricity production has flowed towards hydropower projects in Nepal, investors in solar projects have increased in recent years.

Why is infrastructure construction important in Nepal?

Infrastructure construction in Nepal is not just about building roads and power stations—it's about building the future. These projects create thousands of jobs, improve accessibility, boost trade, and provide essential services to millions.
