

New uninterruptible power supply for home use

Overview

How do I choose the right uninterruptible power supply (UPS)?

Selecting the right Uninterruptible Power Supply (UPS) requires understanding your specific power needs. We'll guide you through the key factors to consider when purchasing a UPS system. First, calculate the total power draw of equipment you need to protect. Add up the wattage of all devices to determine the minimum capacity needed.

Should I buy a ups for my home?

You may find that you're plugging in a lot more power-hungry devices into your home power supply, and this could lead to power cuts or power surges. Your home likely won't have the power backup solutions that your office does, so buying a UPS for your home could be a very wise investment.

What is a ups & how does it work?

What is a UPS?

UPS stands for uninterruptible power supply, it's a device that acts as a battery backup in case of an electrical power failure. Small UPS machines for homes and offices supply enough power for a few minutes, so there's time to turn off devices properly without losing any work.

Which APC ups are best for home use?

This is another great UPS from APC, and with the BE600M1, the company has created a UPS device that is ideal for home use. That's thanks to its small and unobtrusive design, and it offers enough power for smaller devices, such as home NAS drives, routers, and gaming consoles.
