

# Off-grid cost of Indian energy storage container

## Overview

---

How much does energy storage cost in India?

ation. Recent energy storage auctions in India reveal record-low prices, with unsubsidized standalone battery storage bids at 2.8 lacs/MW/month and solar+storage bids at 3.1-3.5 l.

Are battery energy storage systems right for India?

But India's evolving electricity landscape has created an environment where battery energy storage systems (BESS) can earn strong returns from power exchanges, while offering critical system-level support to the grid. Batteries are increasingly recognised as the multitool of the power sector transition.

What are the latest auction results for battery energy storage in India?

India. Specifically, recent auction results for storage have been record-breaking: the latest tender for standalone battery energy storage systems (BESS) with two hours' duration in April 2025 saw a winning bid of 2.8-2.85 lacs/MW/month, without any subsidy like the Viability Gap Funding.

How much does a battery pack cost in India?

costs. Assumes an exchange rate of 84 INR 1 USD. These storage costs imply that Indian developers are accessing battery packs at prices below \$80/kWh and the total storage capex has fallen below \$120/kWh for co-located projects with solar and \$140/kWh for standalone pr

## Off-grid cost of Indian energy storage container

---

Cost of battery-based energy storage, INR ...

Dec 13, 2023 · Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh ...
