Overview

Why do off-grid solar systems cost so much?

Off-grid solar systems typically come with a heftier upfront price tag, often costing two to three times more than a grid-connected setup. Why?

To ensure 24/7 reliability without the safety net of the grid, an off-grid system needs to be much larger than a grid connect system, i.e. more solar panels and more battery storage.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

Why should you choose a modular solar power container?
