

Papua New Guinea foreign trade solar energy system

Overview

Does Papua New Guinea have energy access?

Papua New Guinea (PNG) is the Pacific's largest country with one of the world's lowest rates of energy access (13%). To address this development challenge, Australia, Japan, New Zealand, and the USA joined hands with the PNG government in late 2018 and signed the PNG Electrification Partnership.

Does Papua New Guinea have a country Factsheet?

Specifically for Papua New Guinea, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

How will the power sector invest in PNG over the next 10 years?

Most new power sector investment in PNG over the next 10 years is expected to be organized around projects identified in the LCPDP (generation and transmission investments on the POM and Ramu grids) and the NEROP (electrification nationwide). In addition, there is a need for generation and transmission investment in the other grids.

What is the PNG electricity partnership?

The primary purpose of the Partnership is to support PNG to achieve its ambitious goal of connecting 70% of the population with reliable electricity by 2030. But fulfilling these aims will be a complex, confrontational and resource intensive task. The Partnership clearly has implications beyond PNG.
