Overview

What is cadmium telluride (CdTe) photovoltaic glass?

Cadmium Telluride (CdTe) photovoltaic glass is a type of solar photovoltaic glass that incorporates thin-film photovoltaic technology based on the semiconductor compound cadmium telluride.

What is a PV curtain wall?

The PV curtain wall is the most typical one in the integrated application of PV building. It combines PV power generation technology with curtain wall technology, which uses special resin materials to insert solar cells between glass materials and convert solar energy into electricity through the panels for use by enterprises.

Are PV curtain walls good for commercial buildings?

Compared with ordinary curtain walls, PV curtain walls can not only provide clean electricity, but also have the functions of flame retardant, heat insulation, noise reduction and light pollution reduction, making it the better wall material for glass commercial buildings.
