

Portable battery cabinet capacity monitoring

Overview

What batteries can a bvm-100 meter measure?

The BVM-100 meter accurately measures most Lithium, Lead Acid, and Lithium Iron Phosphate batteries ranging from 12-60V. It can measure the remaining capacity and voltage of these batteries.

What types of batteries can a battery meter measure?

The Powerwerx battery meter can measure various Lithium and LFP batteries, ranging from 2 cell all the way up to 19 cell battery configurations.

How does the battery meter work?

The battery meter displays a graphic battery capacity gauge, along with battery voltage and percentage of remaining battery capacity. It offers multiple function and display settings, allowing users to program it according to their needs.
