

Price comparison of solar module equipment manufactured in Niue

Overview

When will the Niue energy project be completed?

The project will be completed mid-2026 when the Government of Niue under the Department of Utilities and Niue Power Corporation (NPC) will take over the ownership. We anticipate savings of 816,000 litres of fuel and 2,202 tCO₂e in year one. It will support Niue to deliver on our climate goals and Nationally Determined Contributions (NDCs).

What is NREL manufacturing cost analysis?

Roadmaps identifying potential pathways for cost reduction. Many NREL manufacturing cost analyses use a bottom-up modeling approach. The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled.

What is NREL's bottom-up manufacturing cost analysis?

NREL researchers consider the full production processes of solar cells and modules when conducting bottom-up cost modeling. Since 2010, NREL has been conducting bottom-up manufacturing cost analysis for certain technologies—with new technologies added periodically—to provide insights into the factors that drive PV cost reductions over time.

How are PV production costs modeled?

The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled. Input data for this analysis method are collected through primary interviews with PV manufacturers and material and equipment suppliers.
