

Price list for 30kWh folding containers used in wastewater treatment plants

Overview

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

How many m³ of wastewater can a containerized wastewater treatment plant handle?

We have experience with containerized wastewater treatment plants for up to 1,380 PE or 207 m³ of wastewater per day. A wastewater treatment plant is only as effective and efficient as the installed system.

Where are Klaro containerized wastewater treatment systems made?

KLARO containerized wastewater treatment systems are all manufactured, pre-assembled and tested at our site in Bayreuth. You can rely on the top quality of all installation parts. Thanks to the high-quality workmanship, the systems can be operated in any climate zone.

How much energy does a containerized wastewater treatment plant use?

No planning or buildings are required to operate a containerized wastewater treatment plant - the plant simply needs to be placed on a solid base. This saves costs in advance, and the system is also highly efficient during operation: a 20-foot container only needs 13 kWh/d. Container.One, Container.One+, Container.Pro and Container.Xtra.
