How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be  $\$800,000 * 0.08 = \$64,000$ .

How much does a battery management system cost?

Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets: Ewert Energy Systems - One of the earliest BMS providers (since 2008), Ewert focuses exclusively on high-end custom BMS design, especially for large-scale battery storage systems. Typical price range: \$3,000-\$10,000.

How much does a 2MW battery storage system cost?

In total, the cost of a 2MW battery storage system can range from approximately \$1 million to \$1.5 million or more, depending on the factors mentioned above. It is important to note that these are only rough estimates, and the actual cost can vary depending on the specific requirements and characteristics of each project.
