

Price of solar panels installed in North Africa

Overview

Where are solar panels installed in Africa?

Most of the grid-connected residential solar PV systems in Africa are installed either in North African countries or in South Africa. Tunisia and South Africa in particular have established markets, while Morocco has successfully used solar PV to electrify villages. These markets have competitive costs compared to OECD countries.

How much does solar PV cost in Africa?

On-grid commissioned and planned utility-scale solar PV projects between 2014 and 2018 in Africa range from around USD 1.2 to USD 4.9/W (USD 1 200 to 4 900/kW). Although Africa is currently home to a very small set of utility-scale solar PV projects, costs have been declining over time.

How much does a solar PV mini-grid cost in Africa?

Stand-alone solar PV mini-grids or solar PV-hybrid mini-grids have installed costs in Africa ranging from USD 1.9 to USD 5.9/W for systems greater than 200 kW. Solar PV mini-grids that came online in 2012 or earlier have higher costs.

How much does a solar system cost in West Africa?

The systems in West Africa for which IRENA has data are smaller in size, with correspondingly higher costs per watt, although the larger systems are close to the median value of USD 2.9/W (with little difference for the on- and of-grid projects).
