

Price quote for 20kW photovoltaic container used in Australian ports

Overview

How much does a 20kW Solar System cost in Australia?

For this reason you will not find highly specific prices for solar products and installation that will be tailored for you. A rough guide for the cost of a 20kW solar PV system in Australia is anywhere between \$20,000 – \$35,000. For a customised quote based on your situation, contact our specialists who can provide you with a free quote.

What is a 20kW commercial solar PV system?

A 20kW commercial solar PV system is ideal for businesses with low to medium energy usage. Rising grid electricity prices make this an even more attractive option. Should you have sufficient roof space, a 20kW solar system can also be outfitted into larger residential homes to effectively boost savings while meeting their power needs.

How long does a 20kW Solar System last in Australia?

The average payback period for commercial 20kw solar pv systems in Australia is between 3 and 5 years. When you take into consideration the 25-30 year lifespan of a quality solar pv system, this leaves you with 20-25 years of positive cash flow to your business. How can I improve the Return on Investment for my 20kW solar system?

.

Is a 20kW Solar System a good investment?

A 20kW system will produce enough solar energy to power your business, payoff the system cost and become a profitable investment in just a few years. Before you rush out to create your own solar farm, you should understand the role of each of the components of a commercial pv system.
