What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

Why do you need an uninterruptible power supply?

Computers, telephones, and many other pieces of equipment require continuous power to maintain productivity and efficiency. Any unexpected disturbance in the electricity supply can lead to damaging disruptions in business operations, and the resulting downtime and data loss can be costly. An uninterruptible power supply can avoid such issues.

Which power supply system is best for your business?

Uninterruptible power supply systems are the optimal choice for standby power in most situations. If your business requires a continuous supply of power for mission-critical operations, a suitable UPS system is essential. There are very few viable alternatives to UPS.
