

Rtk outdoor base station installation

Overview

Why should I set up my own RTK base station?

Setting up your own RTK base station gives you full control over your GNSS workflow, saves on subscription costs, and boosts your field accuracy. Whether you're working on construction, land surveying, or agriculture, this step-by-step guide will help you confidently set up a stable RTK base station using professional-grade equipment.

What is an RTK base station?

An RTK base station is a fixed GNSS receiver placed on a known or unknown point. It used satellite signals to continuously calculate its position. Then it sends real-time correction data to a rover in the field. Thus, your rover can achieve maximum accuracy, up to centimeters. This practice replaces you being off by several metres using GPS alone.

How to connect RTK reference station?

Follow the onscreen instructions to connect RTK reference station and set network successfully.4. Go to Settings or tap the Status bar on the RTK reference station page to view its data or update the firmware if necessary. To optimize the performance of the RTK system, the RTK reference station must be in an open area to receive satellite signals.

How do I broadcast RTK corrections?

There are two main ways to broadcast RTK corrections: Once the base is active and corrections are broadcasting: Connect your rover to the base via radio or NTRIP. Confirm it receives a fixed RTK solution. Stake out or collect a few known test points. Check against local control to verify accuracy.
