

Sao Paulo solar Energy Storage Project in Brazil

Overview

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Which country has the largest solar PV market in South America?

Despite being the largest solar PV market in South America, with over 47GW of capacity installed – as of August 2024 – according to solar trade body Absolar, Brazil lags behind Chile when it comes to energy storage. Since Chile passed a major energy storage bill, gigawatts of energy storage co-located with solar PV are being built in the country.

Why does Brazil conduct solar power auctions?

Brazil typically conducts auctions to secure power capacity for periods when demand peaks but supply diminishes, such as late afternoons – a time when solar power production declines. The June 2025 auction, exclusively for batteries and storage systems, is the first time the government allows such technologies to participate.
