

# **Sao Tome Transparent Series solar Glass Module Shipments**

## Overview

---

What are transparent glass-glass modules sunovation eForm clear?

Transparent glass-glass modules SUNOVATION eFORM clear are especially used for large-scale glazing with integrated photovoltaic in overhead applications and as solar facades. However, they can be configured for fall protections, conservatories, canopies, artworks and much more. Photovoltaic. Yet aesthetic.

What are the characteristics of a BIPV-plant with transparent glass-glass modules?

The overall appearance of a BIPV-plant with transparent glass-glass modules is characterized by its level of transparency. Characteristic for transparent solar modules with crystalline solar cells are the visibility of the individual solar cells and their shadowing.

What is a transparent glass-glass module?

Transparent glass-glass module. Convincing details. made in Germany. Transparent glass elements with integrated photovoltaic for spectacular BIPV-projects. The crystalline PV-cells are a striking design feature and communicate the use of renewable energy. The individual product layout allows free choice of size and form.

What are the characteristics of transparent solar modules with crystalline solar cells?

Characteristic for transparent solar modules with crystalline solar cells are the visibility of the individual solar cells and their shadowing. Light transmission and appearance can be determined upon request and area of application by cell size, number and layout of the cells.
