

Senegal Power Station Generator Set

Overview

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

Who owns Senegal's power?

Senelec owns 15%, while West African Energy controls the remaining 85%. The project, located near Dakar, will use indigenous gas, potentially reducing Senegal's power rates. Turbines are supplied by General Electric, while engineering and construction are handled by Calik Enerji. Sendou - 125 MW.

How does Senegal support regional energy cooperation?

Senegal supports regional energy cooperation as a member of the West African Power Pool (WAPP) and is a member of regional organizations to develop hydroelectricity resources on the Senegal (OMVS - Senegal River Basin Development Organization) and Gambia (OMVG - Gambia River Basin Development Organization) rivers.
