## Overview

---

What is the function of a solar combiner box?

A solar combiner box, such as the one offered by GEESYS, is a device that provides interconnection between the input leads from the solar PV modules and the output lead to the re-combiner Box or inverter. It is customized for different configurations based on the number of strings of solar PV modules used in the PV layout.

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

What are the safety features of a top solar combiner box?

Top solar combiner boxes typically come with multiple safety features, such as disconnect switches, circuit breakers/fuses, surge protectors, and lightning arrestors. These features stop the flow of current when there is a surge, a short circuit, an arc fault, or similar electrical faults.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met. Do you have any questions?
