

# Solar bottom suction water pump

## Overview

---

How a solar submersible pump works?

Solar submersible pumps are used where water has to be lifted from deeper underground. If put in simple words, this pump is used to lift water from a depth of more than 15 meters. To lift the water, simply put the pump inside the water and switch it on, the rest of the work will be done by the solar itself.

What is a solar water pump?

A solar water pump is an innovative technology water lifting system that is powered by solar energy. It is also known as Solar Pumping System, Solar Submersible Pump, and Solar Pump. This system typically consists of a solar panel, solar inverter, controller, and sometimes a solar battery.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

Does a poly solar panel kit have a submersible well pump?

The Poly Solar Panel Kit has a 12 V submersible well pump. It's ideal for bigger applications, such as farms, irrigation or camping sites. The pump benefits from the highest engineering design, since it can be submersed up until 30 meters underwater without any problem.
