Overview

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.

When will Photovoltaic Glass be made?

Officially commenced production in June 2020. By the end of June 2024, the daily melting capacity of photovoltaic glass is 2,000T/D. Officially commenced production in 2016. By the end of June 2024, the daily melting capacity of photovoltaic glass is 3,100T/D.

Will declining solar PV glass prices bolster global market growth?

The global solar PV glass market is characterized by several key trends that are expected to play an important role in the coming years. Declining solar PV glass prices are presumed to bolster the global market growth over the forecast period.

What is the global solar PV glass market size?

The global solar PV glass market size was valued at USD 3.23 billion in 2016. The growing emphasis on the adoption of clean energy sources is likely to be the key driver for the market growth in the coming years. Clean & renewable energy is an affordable alternative to fossil fuel-based electricity.
