

Solar lighting integrated solar lamp

Overview

What is integrated solar street light?

Please contact us for further details. Integrated solar street light means that the whole solar street light system is integrated into an LED street light, that is, there is a solar panel on the street light, and the street light contains batteries, controllers, microwaves, etc.

Why should you choose integrated solar street lights?

Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways. Installation is very easy and price per street light unit is cheaper than other brands.

What is a split solar LED street light?

The split solar led street light (i.e. all in two solar street light) is widely used, it is not only for road, but also for laneway, garden, park, square etc. We supply manufacturer OEM/ODM service to bring you a unique value.

Why should you choose Hei solar LED street lights?

HeiSolar focus on developing and manufacturing customized outdoor solar LED lighting systems for a wide range of lighting applications. Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways.
