

Solar micro-light solar container power supply system

Overview

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What is a SWT solar container?

SWT solar container uses PV and battery to supply power to the load, and diesel generator as a backup power supply to supply power to the load when PV and battery are insufficient. Designed to provide flexible options that are configured according to your power needs. Scalable and reproducible, ensuring optimal performance and efficiency.

What is a containerized solar microgrid?

SWT's containerized solar microgrids offer a clean, dependable, and cost-effective solution to the telecom sector. For agricultural operations to run efficiently and affordably, energy is a must. The demand for energy resilience in agribusiness is greater than ever as grid interruptions become the new norm.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.
