

# **Solar panels generate electricity to make money**

## Overview

---

How can you make money from solar power?

You can make money from solar power by selling excess electricity back to the grid through net metering, earning solar renewable energy certificates (SRECs), leasing your rooftop to solar companies, and investing in or developing solar farms. These strategies help you generate income while promoting renewable energy use.

How can I make money from solar panels on my roof?

The easiest way to make money from solar panels on your roof is through net metering. Utility users that produce solar power can feed part of the excess energy back into the grid thanks to net metering. With this billing strategy, solar clients receive credits against their electricity usage, which lowers their monthly expenses.

How do solar panels generate electricity?

Solar energy typically generates electricity by turning solar light energy into electricity. Flat solar panels can be attached to a building's roof or arranged across open areas to produce photovoltaic (PV) energy.

How much money can you make with solar power?

The amount of money you can make with solar power depends on several factors, including the size of your solar installation, local electricity rates, government incentives, and the specific method you choose.
