

Solar panels in Iraq

Overview

Are solar panels a good investment in Iraq?

The renewable energy sector in Iraq is witnessing a significant transformation, with solar energy taking the forefront in this change. The country's abundant sunlight makes it an ideal location for solar power generation, leading to a growing interest in solar panels in Iraq.

Where are solar panels coming from in Iraq?

With a focus on innovation and sustainability, Baghdad continues to attract investments in solar technology, making it a key player in the nation's journey towards renewable energy. Basra, another significant city in Iraq, is rapidly emerging as a crucial hub for the solar panel industry.

Why is Iraq launching a solar energy project?

"The solar energy project contributes to increasing the production of electrical energy, to supply the system with clean renewable energy," the government added. "It is also one of the first pilot projects in Iraq, which is implemented for the first time." No more technical or financial details on the new scheme were released.

How much solar power does Iraq have?

According to the International Renewable Energy Agency, Iraq has an installed PV capacity of only 216 MW despite a huge solar potential. No additional solar power has been deployed in the country in the past three years.
