

Solar power station generator integrated device

Overview

Solar-Storage Genset Integrated Unit combines photovoltaic panels, energy storage, and diesel gensets into one integrated solution. Can a portable power station be turned into a solar generator?

Using DJI's solar panels, you can turn your portable power station into a solar generator. This setup provides all the unlimited energy the sun has to offer, without the noise, pollution or recurring fuel payments associated with a traditional generator.

Can a DJI portable generator be used as a solar generator?

DJI portable generators are built to be mobile, last, and produce power. Whether it is powering your mini-fridge, charging your drone or running tools, wherever you are. Using DJI's solar panels, you can turn your portable power station into a solar generator.

Why should you choose DJI power stations & solar generators?

From the adventurer to the homeowner, from the professional who traverses the city streets, DJI's portable power stations and solar generator solutions deliver reliability and sustainability. Discover the range today, and fuel your life, anytime, anywhere.

What is a portable power station?

A portable power station is a small battery storage generator that can be charged and provides power where and when you need it. This makes them good off-grid power sources when you need backup power during a power outage, are heading into the wilderness, or are working remotely on a job site.
