

Solar power station in China in Spain

Overview

Where are solar power stations located in Spain?

The majority of the deployment of solar power stations in Spain to date occurred during the boom market of 2007-8. [needs update] The stations are well distributed around the country, with some concentration in Extremadura, Castile-La Mancha and Murcia.

Where is the largest solar power plant in Spain?

As of September 2024, the Francisco Pizarro Solar PV Park, located in the autonomous community of Extremadura, was the second-largest solar photovoltaic power plant located in Spain, with a power capacity of 590 megawatts. The Trillo Solar PV Park, located in Castile-La Mancha, ranked first with a total capacity of 626 megawatts.

How many solar power plants are there in Spain?

At present, there are only three commercial size power plants of this type in Spain, notably the Sanlucar Solar Park, with the operating PS-10 solar tower of 11 MW and the PS-20 of a 20 MW capacity; and the 20 MW Gemasolar with a molten salt heat storage.

Can Spain become a green energy leader?

Spain is trying to position itself as a connector country between China and Europe. After Prime Minister Pedro Sanchez' official visit in September last year, Spain abstained on the EU's Chinese electric car tariffs vote, and now China is investing heavily in Spain's goal to become a green energy leader.
