

Solar power storage in China in Uzbekistan

Overview

What is Uzbekistan's First Energy Storage Project?

Installed with Sungrow's cutting-edge liquid-cooled ESS PowerTitan 2.0, this facility marks Uzbekistan's first energy storage project and stands as the largest of its kind in Central Asia. The project will play a pivotal role in driving the region's energy transition forward and setting a sustainable precedent.

Will China build a solar power plant in Tashkent?

TASHKENT. Oct 15 (Interfax) - Projects for building a solar power plant and energy storage systems involving Chinese companies have been launched in the Tashkent region of Uzbekistan. A solar power plant valued at \$240 million will be built together with China Datang in the Boka district, the presidential press service said.

Will China Datang build a solar power plant in Boka?

A solar power plant valued at \$240 million will be built together with China Datang in the Boka district, the presidential press service said. It will produce 576 million kWh of electricity a year.

How much did Tashkent invest in a textile park?

An industrial textile park will be built on 69 ha in the Yuqorichirchiq district with investment standing at \$350 million. More than 20 enterprises will be located there and will produce yarn, dyed fabric and finished textile products. A total of \$1 billion was invested in the Tashkent region in 2023, the press service said.
