

Solar power system supply in North America

Overview

What is the sinovoltaics supply chain map - North America for Q2 2024?

June 1, 2024 The Sinovoltaics Supply Chain Map (SSCM) - North America for Q2 2024 includes several notable changes for the US solar market since our Q1 report, emphasizing the importance of supply chain traceability. Several new solar panel manufacturers and related PV factories have been added.

How big is the North America solar PV market?

The North America solar PV market size crossed USD 29.3 billion in 2023 and is projected to observe around 6.2% CAGR between 2024 and 2032, due to higher usage to power various electrical devices or fed into the grid for broader distribution.

What are the benefits of a solar PV supply agreement?

Collaborations between various solar PV manufacturers and local partners will support the market expansion into new geographic regions and segments. Additionally, supply agreements ensure reliable supply chain management, mitigate supply chain risks, and support the scalability of solar PV manufacturing operations.

What is the market share of utility solar PV in 2023?

Utility solar PV witnessed a market share of over 69% in 2023. Growing interest to reduce dependency on conventional fuels and establish strong supply chain of components & materials for project development will strengthen the industry landscape.
