

Solar powered air conditioner in Brno Czech Republic

Overview

What is a split solar air conditioner?

Split solar air conditioners are air conditioning system that uses solar energy to power the compressor and the cooling process. They consist of two main components - an indoor unit and an outdoor unit. The indoor unit is installed inside the room, while the outdoor unit is installed outside, usually on the roof or a balcony.

What is a solar air conditioner?

Deye's innovative solar air conditioner series represents a breakthrough in sustainable cooling technology, combining eco-friendly operation with powerful performance. Our solar air conditioners are designed to significantly reduce electricity costs while providing reliable cooling even in the most challenging environments.

How much does a solar air conditioner cost?

The exact amount depends on the number of air conditioners, the number of solar panels required, and a few other variables. Solar-powered air conditioners can cost \$2000 before installation while around \$5000 including installation. However in some cases, though, this can gain you a 26% tax credit to bring your costs down.

How efficient are solar-powered air conditioners?

As you explore options for solar-powered air conditioners, understanding power source efficiency is vital for making an informed decision. These units convert sunlight into electricity, which helps reduce energy costs. Pay close attention to the solar panel's efficiency, typically ranging from 15-22% for polycrystalline and monocrystalline panels.
