

Solar-powered containerized DC power supply for wastewater treatment plants

Overview

Are wastewater treatment plants using solar energy?

With rising energy costs and the worsening climate crisis, some wastewater treatment plants have started using solar energy. Because solar adoption at wastewater treatment plants is still relatively new, there is little known about these facilities, including where they are, what drove them to choose solar, and if solar has been a success.

Can a municipality install a solar system on a wastewater treatment facility?

So in some cases, wastewater treatment facilities are— the municipalities are installing the solar on site and directly consuming that electricity. And many other scenarios, the municipality is entering what's called a power purchase agreement with a solar developer.
