

South Sudan energy storage power export

Overview

How much crude oil is exported from Sudan and South Sudan?

Sudan and South Sudan averaged about 145,000 b/d of crude oil exports between 2014 and 2023, according to estimates by Vortexa and EIA. Total crude oil exports from Sudan and South Sudan have declined over the past decade as a result of lower overall production from both countries.

Does South Sudan have electricity?

South Sudan is one of Eastern Africa's major oil resource holders but exported more than 85% of its production in 2014. Only 1% of the population had access to electricity in the country in 2017.

Is biomass a source of electricity in South Sudan?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. South Sudan: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Does Sudan use coal?

- Neither Sudan nor South Sudan produces or consumes any coal. Total installed generation capacity in Sudan was 4.5 gigawatts (GW) in 2021. About half of the capacity was from fossil fuel sources, about 43% from hydroelectricity, and the remainder (57%) from renewable energy sources such as solar and biomass.
