

# **Southern Europe exports energy storage**

## Overview

---

How big is Europe's energy storage capacity?

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

Which European countries adopted energy storage in 2024?

The rate of energy storage adoption varied across European countries in 2024. Pumped-hydro storage (PHS): Italy, France, Germany, and Spain had the largest capacities. Residential electrochemical storage: Germany and Italy remained the top markets despite a slowdown.

What is the future of energy storage in Ireland?

Future market potential is concentrated in pre-sheet energy storage and energy storage co-located projects, residential and commercial storage market space is not large. Ireland's battery storage capacity is expected to grow from 792 MW in 2023 to 3.9 GW in 2030, mainly in the pre-table storage market.
