

# Sudan solar broken glass

## Overview

---

Why is glass breakage a problem in solar power plants?

Modern PV modules often use thinner glass to reduce weight and material costs which lead to glass breakage. Glass breakage is a growing concern for the solar power plant operators.

Can solar energy be used in Sudan?

Research and projects on solar energy in Sudan have primarily concentrated on solar PV systems, with relatively limited focus on solar thermal energy. Nevertheless, there are some studies that have explored power generation using CSP technologies.

How much solar power will Sudan have by 2035?

Plans are underway to deploy 1200 solar pumps in West and North Kordofan. By 2035, the government also plans to establish 190 MW of solar PV home systems, 400 MW of solar pumping, 250 MW of rooftop PV systems, and 27 MW of PV-diesel hybrid systems. In wind energy, Sudan aims to achieve a total installed capacity of 1550 MW by 2035.

Could pyrolysis power plant support the Sudanese electricity grid?

Muhammed proposed a conceptual pyrolysis power plant to support the Sudanese electricity grid. The plant with a capacity of 30 m<sup>3</sup> is projected to produce a maximum of 124 GWh/year, highlighting its potential as a scalable and efficient solution for bioenergy production in Sudan.
