

São Tomé Photovoltaic Folding Container Single-Phase Manufacturer

Overview

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

What is a solarfold mobile drive system?

The mobile drive system consists of a flexible drive unit mounted on traverses and can also be used for other solarfold PV power plants. On request, the mobile Solar Container can be supplied with the necessary accessories for complete independence. pay-back. Solarfold is far more than just a pioneering means of producing clean electricity.
